

# CT200

## Center Thickness measuring device

- + precise and robust center thickness measuring device for risk free and precise CT measurement on lenses
- + attractive price
- + automatic centering of the work piece via innovative 3 finger grip system
- + Adjustable and fixable work piece diameter setup via hand wheel.
- + fast loading and unloading of the work piece via handle, located on the right hand side
- + integrated protection against dropping of the work piece during opening and closing of the gripping system.
- + measuring via simultaneous movement of 2 measuring pins driven by a gear-spring system
- + optionally with PC interface for documentation of measuring results.
- + large measuring range

### Technical data:

Working range	100mm total travel
Diameter range	10 – 200mm
Measuring system	Measuring gauge with digital display, additional analog display for tolerance field
Accuracy	+/- 1 $\mu$ (tolerance of measuring gauge)
Dimensions (WxDxH)	350x500x550mm
Weight	approx.15kg
Connections	Power: 100-240V / 50/60Hz
color	Light grey RAL7035
